

Staging Services

by Just In Boston

Some buyers can walk into an empty home and let their imaginations run wild. Others, simply see bare walls and empty floors.

Staging is a proven and effective way to increase the sales price of your home and shorten the time it spends on the market.

"Staging speeds up sales in a sluggish market, and...can bump up prices 2% to 10% in a moderate market. The biggest advantage occurs with luxury homes... where effective staging can boost prices by 20% to 50%."

- Wall Street Journal's Guide to Property: 'How Staging a House Can Pay Off For Sellers'

Successful staging schemes will maximize the advantages of your floor plan, while minimizing its flaws.

We are always looking for ways we can do more for our clients, and in 2007 Just In Boston Properties became the market's **only** real estate agency to offer in-house staging services as a way to increase property values for our clients.

We do more, you get more.

Just In Boston Properties has a large and varied inventory of high quality staging furniture and accessories that can transform outdated properties into stylish living spaces that attract today's buyers. We do not rent furniture or contract to a third party staging firm. By offering this as an in-house service, we can offer it without any upfront fees to sellers.
